- English: Fluent

PROFILE

Automation Engineer and Full-Stack Developer with 3+ years of experience building scalable automation systems and AI-driven workflows. Strong in no-code/low-code platforms, API integrations, and web development, with a proven track record of delivering efficient, production-ready solutions for global clients.

WORK EXPERIENCE

Automation analyst

DEVSINC (PAKISTAN)

Projects:

- Unfulfilled 72-Hour Order Monitoring: Built an n8n workflow that checks Shopify orders every 3 hours and automatically updates unfulfilled orders older than 72 hours into Monday.com for ops tracking.
- AI Email & Meeting Automation: Developed an n8n-based AI workflow to analyze inbound emails, manage context memory, check availability, book meetings, and send automated responses.
- Airtable API Workflow Orchestration: Designed a Make.com automation using routers, HTTP modules, and iterators to sync, branch, and process Airtable records across multiple workflows.

Senior Automation & Integration Engineer (Remote)

Rockwell Automation (US-Company)

- AI-Driven Lead Generation Pipeline: Built a Make.com automation using Google Forms, Apollo, Apify, OpenAI, and Google Sheets to enrich, qualify, and route leads automatically.
- Contract Royalty Extraction Automation: Developed an n8n workflow to extract royalty data from contracts, process it programmatically, and generate structured Excel reports.
- CRM Pipeline & Email Automation: Implemented a CRM workflow to tag leads, update opportunities, and trigger automated emails based on form submissions

STANDARD BOTS(US-COMPANY)

- AI Complaint & Feedback Classification System: Built an n8n workflow using AI Agents to analyze form submissions, classify complaints/features, create records, and notify teams via Slack and email.
- AI Commerce Assistant (Telegram + Shopify): Developed an AI agent integrated with Telegram and Shopify to fetch orders, create/update products, and manage store operations through conversational commands.
- Automated Lead Follow-Up System: Implemented a CRM email automation to handle replies, intent-based branching, follow-ups, internal notifications, and drip sequences.

TEAM LEAD (PRIVATE LABEL DEPARTMENT)

Ecom Hawks - Lahore

- Led a team of 7 virtual assistants, optimizing workflows and overseeing performance.
- Managed and mentored the team, acting as a liaison between clients and ensuring effective communication.
- Utilized strong analytical skills with MS Office and Google Sheets to evaluate performance metrics.
